**Map:** 1:10 000/5 m, fieldwork 2018-2019, non-waterproof, size A4. Due to forest operations there are changes in the terrain, there might be paths not drawn on the map. There might be more clear parts and at some places fallen trees can be found.

**Terrain:** Very varied terrain, some parts very rich in contour details. Typical objects of the former coal mining and quarrying can be found. Mostly beech forest with good runnability, big open plateau in the central part of the terrain. Real enjoyment of orienteering.

Small paths can be difficult to notice because of the leaves. Many steep ditches, erosion gullies can be found in the terrain crossed by the longer courses. Watch out for the extreme steep ditches! Cliffs marked with impassable are truly impassable! The surface is strongly stony at some parts. Consider searching the places where it is safe to pass.
