TERRAIN, MAP

Typical mid-mountain, Vértes hills terrain. The topography is quite detailed, the hill-sides are carved with valleys, steep and rocky in some places. Vegetation is generally well runnable, denser vegetation occurs in more closed forests, but open parts are very well runnable everywhere. Please find some samples below.

The old map can be found here:

http://adatbank.mtfsz.hu/esemeny/show/esemeny_id/7914

We created a new LIDAR based map for the competition.

Map size and scale can be found by the course details.

On Day 1 active forest cultivation is taking place in the western part of the map on the longer courses. There may be minor changes on the map.

CATEGORY MERGES | Due to a lack of entries, we will not have a W35A category.

There are no other changes in categories.

OPEN CATEGORIES | There will be a start list for open categories, but new entries can be made outside the empty start times (no limit on the number of entrants). There will be a separate corridor for open categories in the start.
